

# 2010 Naturalists by Numbers

## **Mission:**

This program was created to provide a fun, first-hand learning experience for the Chert Glade Master Naturalists as they grow in their naturalist's skills. It is meant to be a cooperation effort as well as an education tool to spend quality outdoor time with family and friends.

Missouri  
Master Naturalist

Piece by piece we are building a natural mosaic of higher learning.

# 2010 Guidelines

## Selected Targets:

Goals are set at three levels:

*Bluewinged Level* - for all participants contributing to the program.

*Goldeneye Level* - for all Master Naturalists reaching the goals of all categories and sharing with their families, friends and fellow Master Naturalists along the way.

*Trumpeter Level* - for those with regal enthusiasm and seeking more of nature's grace & wonder.

All participants will be recognized at the end of each year. A permanent display will feature *Naturalists by Numbers* for the life of the chapter.

Recording will be on the honor system and can be as simple or scientific as you wish.

Record keeping may be tallied in a variety of ways. Data sheets will be provided for three ring notebooks if MMN choose to use them. Sightings will be shared with peers and numbers can be turned into Jeff Cantrell any time during the course of the year.

	<u>Goldeneye</u>	<u>Trumpeter</u>
Glade Types Explored	2	3
